

PROJECT DATA SHEET **C13-37**

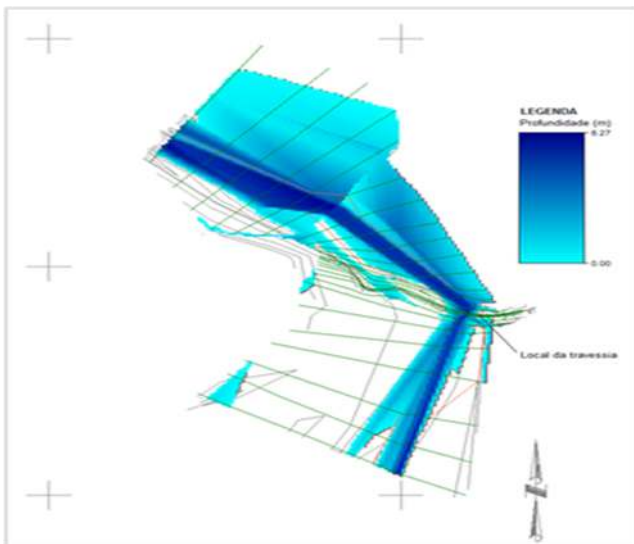

**HYDRAULIC AND HYDROLOGICAL STUDY OF A BRIDGE IN THE UREMA RIVER IN THE GORONGOSA NATIONAL PARK**

**About the Project**

BETAR was contracted by Gorongosa National Park to study a river crossing to benefit tourists visiting the park to cross to the other side of the Urema River.

BETAR hired CONSULTEC to do the hydrological and hydraulic site for the construction of a bridge over the Urema River, tributary of the Pungoé River, whose alignment is in the African Rift, creating a special wetland with a lake where many animals find their habitat.
