

PROJECT DATA SHEET C18-05

TECHNICAL ASSISTANCE TO INAM

About the Project

The contract is part of a broader WorldBank project to strengthen the capacities of INAM, DNGRH and ARAs institutions, and the objective of the contract is to improve meteorology services by modernising monitoring and weather forecasting and creating weather information products.

The contract included: Institutional reinforcement, training, improvement of the quality system, the information transmission system, the forecasting system, and the development of new products on meteorological information.

CONSULTEC has served as the national operational manager and contributed in the procurement and legal aspects. Within this scope, accompanied and assisted in the development of all tasks.
