

PROJECT DATA SHEET **C18-23**

## **IMPLEMENTATION OF THE RESETTLEMENT ACTION PLAN FOR ANADARKO MOZAMBIQUE AREA 1 PROJECT**

---

### **About the Project**

In 2010, Anadarko made its first discovery in Rovuma Basin Area 1, in northern Mozambique. The company has discovered more than 75 trillion cubic feet of natural gas resources in Offshore Area 1 and is working to develop a Liquefied Natural Gas (LNG) project in Afungi, Cabo Delgado.

The construction and operation of the LNG project will require the physical and economic displacement of more than 1500 households (HH). A detailed resettlement plan was prepared and approved by the Government of Mozambique.

Consultec was appointed to provide the following services:

- Verification and Updating services of Socio-economic data and assets of the families affected by the Anadarko Mozambique Area 1 project, during Phase 0 and Phase 1 of the project;
- Update of the socio-economic data and assets of those affected;
- Receiving grievances and complaints from those affected;
- Obtaining signatures on resettlement agreements and support in the transport of resettled persons' goods.
