

PROJECT DATA SHEET C18-54

APPROVAL OF PROJECTS AND SUPERVISION OF THE REHABILITATION OF 3 DAMS IN THE PROVINCE OF CABO DELGADO

About the Project

The project consists of the rehabilitation of 3 landfill dams to meet the needs of the local population in terms of consumption and small-scale irrigation.

In the project preparation phase by the Contractors, CONSULTEC was responsible for making comments and suggestions to the projects and demanding compliance with the legislation in force. In the Inspection phase, through the presence of inspectors on the sites and periodic visits of the Coordinator, compliance with the assumptions of projects in the field is guaranteed, and measurements of the work carried out for the certification of the Records issued by the Contractor periodically.

In addition, CONSULTEC is responsible for budgetary control of the works, approval of the quantities to be invoiced by the Contractor, and forwarding the invoices to the Construction Owner.
