

PROJECT DATA SHEET **HSEQ 11**

**PREPARATION OF THE OCCUPATIONAL HEALTH
GUIDE FOR MINES - MISAU, MITESS, AND MIREME**

About the Project

The project consists of the development and implementation of a Guide to Occupational Health and Safety in the Workplace, specifically for inspections in mines.

The reports and activities under the project are:

- Preparation of the Guide to Occupational Health and Safety in the Workplace (SOST);
- Development of SOST Codes of Practice associated with the guide and Inspection Worksheets;
- Development of the Training Program for SOST Inspectors (online training platform, with knowledge assessment modules and reporting system);
- Development of a system to monitor the execution and effectiveness of preventive and mitigating actions resulting from inspections and audits in the mining sector;
- Development of a system for monitoring and evaluating the performance of the system and reporting to representatives of the General Inspection teams.
